

**2025 Papillon Club of America  
Genetics Keynote Speaker**

**Dr. Cynthia Smith, DVM  
Specializing in Canine Reproduction**

Dr. Smith, or 'Cindy' to many of her loyal followers, is a graduate of Washington State University and has been in practice for over 35 years. On a side note, she worked closely with Dr. Sharon Center on her liver research when she was breeding Maltese.

From her website - "Cindy is a native of Southern California where she received her first introduction to veterinary medicine and began showing and breeding Maltese. She is a graduate of Brigham Young University and received her DVM from the Washington State University College of Veterinary Medicine in 1987. After a brief practice in the Moses Lake, WA area, she joined the staff at The Pet Doctor in Lakewood, WA in 1989 where her work is limited to canine reproduction and pediatrics. While she no longer shows or breeds Maltese, she has a growing flock of various fowl that she shows."

Dr. Smith or Dr. Cindy to all who love her is a very well respected reproduction specialist in the local area among many breeders and is globally recognized for her expertise in this field. With a witty sense of humor she will make any seminar informative and interesting.

Cindy has been a keynote speaker for many breed clubs and has also conducted a seminar for our local Papillon Club in 2015.

Her seminars include the following topic depending on time allotment and she can vary the discussion topics.

- Increase litter size
- Infertility in the male
- Post whelping complications in the bitch
- Ovary sparing spay vs. traditional? Vasectomy vs. neuter? When to do what & why?

***We hope you will take the time out of our Specialty week to attend the seminar.  
You won't be disappointed!***
